

SECRET

10 February 1961

MEMORANDUM FOR: Chief, DOB

SUBJECT : CINCAL's Revised U/W Requirements

REFERENCES : a. Memo dated 8 February from C/WPS to CSR,
same subject, w/attachment TS-176755
(attached)

b. Memo from SR/PL to C/DOB dated 9 December
1960, subject: "USCINCEUR's Revised U/W
Requirements"

1. Confirming our phone conversation attached is copy of referenced memo from C/WPS together with its attached list of revised U/W requirements received from CINCAL and a study comparing the present requirements list with a list of nine requirements received during 1958. This list of revised CINCAL requirements is forwarded for appropriate action which will consist in its essence in making the usual evaluation and considering them one-by-one for formal acceptances on the basis of our AEDEPOT capabilities.

2. Since [] went through the evaluation of the USCINCEUR U/W requirements list only this past month I believe you will find that no further explanations are necessary. The same report form 1715 is required. Since two copies must go forward to WPS with information copies made available to C/PMG and my own files (one copy for each of the latter two offices) please forward to me with your response a total of four assemblies of the 1715 form. Since it will be necessary for me to coordinate with Commo it will be appreciated if you get your response in my hands by about 27 February so that I may meet the 3 March deadline established by WPS.

3. I note from my reading of the attached that no mention is made either in C/WPS' memo to us or in the attachments of priorities, i.e., priorities in the sense of whether action is required during the period D Day to D plus 90 or between D plus 90 and D plus 180. I mentioned this to C/WPS. They

will check back with JCS on this and if any further information is forthcoming I will pass it to you. However, in the absence of any specific mention of priorities, we are nevertheless expected to show under column 6 "Remarks" on the 1715 form when the agent or agents used as a basis for acceptance of a particular requirement can be ready for overseas shipment. You will recall that we stated "15 days" in all cases in connection with the USCINCEUR requirements.

4. With reference to coordinates by which the geographical areas are identified - I checked these out with WPS and they confirmed my guess that the coordinates shown for requirements a. through j. represent, in each instance, the center of a circle of indeterminate radius; the four sets of ~~requirements~~ ^{coordinates} used in connection with each of the areas identified respectively by k.l.m.n. and o., identify the four corners of geometrically regular figures (i.e., squares or rectangles.)
